DETAILED ACTION

Drawings

1. The drawings are objected to because Figures 5 and 7 do not show the legends explaining the reference numerals used in the figures [See MPEP 608.02(V)].
2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Claim 14 recites the limitations “based on an occurrence of a first predetermined condition” in line 4, and “based on an occurrence of a second predetermined condition” in line 7. A similar thing holds for claims 17-21 and 24-27. Therefore, since claims 14-27 are method claims, these features must be shown in a flow chart or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure

is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities:

Applicants should provide the status of each copending applications cited on pages 1, 17, 21 and 25 of the specification.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 14-44 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 14 recites the limitations “based on an occurrence of a first predetermined condition” in line 4, and “based on an occurrence of a second predetermined condition” in line 7. The disclosure does not support “first predetermined condition” and “second predetermined condition”. A similar thing holds for claim 21. Further, claim 28 recites the limitations “first energy level” in line 2 and “second energy level” in line 4. The disclosure does not support “first energy level” and “second energy level”. Claims 15-20, 36-38, 41-43 being dependent from claim 14, claims 22-27, 39-40, 44 being dependent from claim 21, and 29-35 being dependent from claim 28 are also rejected.

In addition, claim 36 recites the limitation "adjusting speed of convergence" in line 1. The disclosure does not support this limitation.

A similar thing holds for claims 37-41.

Double Patenting

6. With the approval of the Terminal disclaimer, the obviousness-type double patenting rejection is withdrawn.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
